

Abstract

Indonesia is the rich country and have many potentials which will develop especially in outside Java island. If the production process in that area (outside Java Island), it will be easy to enter the export market because of cost leadership. Many concerns of bad infrastructures and interconnection between islands will impact to higher distribution cost. The Government should manage the centre of industries by Entrepreneurship concept (the author said Biopreneurship) not by Work and Pay concept. The author hope that with this simple paper will be create the spirit of entrepreneurship in governement staff from Centre Government to Local Governnment and thier will ready to receive International Investors . On the other hand, this simple paper, will be create of interest for students and readers to develop the business in outside Java Island because of still have huge potentials for industries.

Keywords: Entrepreneurship, interconnection, Investor, government
