

## *Abstract*

*Institute of Technology and Business Kalbe is a private institution that is under the auspices of the Education Foundation Kalbe. ITBK as an educational college has many policies, one of which is a policy that every course major has the right to manage its books independently. Books owned by each major is referred to a professional book. To facilitate this professional book program, therefore department of Information system develops computer-based information system that can help manage the courses throughout the books it has. Currently, management of the professional books in every major has included: The addition of the book, the determination of the status of borrowing and returning books, the quick examination of the books by title/publisher/author and the features to make changes to the details of the book if necessary. With this application, the problem of data overlapping between the books of the major and library can be undertaken.*
